

Orbit Analytics - Support FAQ

Customer facing support tiers, response targets and escalation paths.

1. Support Tiers

Orbit Analytics offers three support tiers: Standard, Business and Premium.

Standard support is available by email on business days only and targets an initial response within 24 hours.

Business support adds weekend coverage and targets an initial response within 8 hours. Premium support is available 24 hours a day, every day, and targets an initial response within 2 hours.

2. Severity Levels

Severity 1 means the production service is unavailable or data loss is occurring. Severity 1 is worked continuously until resolved.

Severity 2 means a major function is degraded but a workaround exists. Severity 2 targets a resolution within 3 business days.

Severity 3 covers cosmetic issues and questions; these are answered within 10 business days.

3. Escalation

A ticket that breaches its response target is escalated automatically to the on-call support lead.

Customers may request manual escalation by replying with the word ESCALATE in the ticket subject line.

Escalations are reviewed daily at 15:00 local time by the support manager.

4. Billing and Accounts

Invoices are issued on the first working day of each month and are payable within 30 days.

Plan changes take effect at the start of the next billing cycle. Downgrades do not generate refunds for the current period.

Accounts unpaid for more than 60 days are suspended; data is retained for a further 30 days before deletion.
